

50/50 Sidewalk Program

Administrative Policies

IMPORTANT: Application must include both signed Administrative Policy and total square footage of project.

1. General

The City of Silverton has, since 1988, attempted to promote the repair and replacement of sidewalks on City streets with a program of 50% reimbursement to property owners for reasonable and eligible costs. By this document, the City is seeking to further clarify and set the policies concerning the City 50/50 Sidewalk Program.

2. Application & Selection

- A. All eligible work must be initiated using the application obtained from City Hall and returned to staff.
- B. Applications will be reviewed and the site inspected by engineering staff and a written letter of approval or disapproval will be required before any construction may commence.
- C. The sidewalk program for each fiscal year will begin as of July 1 and no previous applications will be accepted for spending from the new program year unless authorized by the Public Works Director and Finance Director.
- D. Applications will be received and logged in so that a “first come, first served” order is maintained. Selection approval will be on “first come” basis for eligible projects.
- E. Reimbursement of reasonable unit prices will be reviewed and approved by Public Works staff based on the current average estimated bid prices for the Silverton area. If appealed by the applicant, the Public Works Director shall make the final determination whether a unit bid price is deemed reasonable.

3. Eligibility & Administration

- A. All eligible work must meet the criteria listed in Section 2 above.
- B. A City of Silverton ROW Improvement permit must be taken out for all eligible work, and all applicable fees/deposits/bonding must be paid and/or submitted to the Public Works Department.
- C. No more than 50% of any year’s budget for sidewalk repair and construction may be spent on a single sidewalk project. An exception could be allowed to this rule if additional budget authority is granted by City Council.
- D. The property owner will be required to pay the contractor in full and provide a copy of the contractor’s “paid in full” receipt to the City to initiate City payment to the property owner of one half (1/2) of the cost of the work, not to exceed the rate initially approved by the City.
- E. All projects must be constructed by an Oregon licensed contractor with production experience in concrete construction.
- F. Eligibility of a selected project is lost if the project is not completed within six months from the date of the City’s approval letter or within the budget year (July 1 – June 30). In order to become re-eligible, a new application must be filed.
- G. All applications lapse on June 30 of each fiscal year unless a letter approving the project is issued by staff with a completion deadline after June 30.
- H. This funding is not eligible in conjunction with new dwelling construction unless a sidewalk exists on the development site that is determined by the City to be in disrepair.

4. Standards

All eligible projects shall conform to City standards for sidewalk construction and inspection and be approved by the City to be eligible for reimbursement.

I have read the Administrative Policy attached to this application and agree to comply with the stated requirements in order to receive reimbursement.
